

**For Immediate Release**

## **Camilion Solutions™ Authority Suite® Earns ‘Powered by SAP NetWeaver®’ Certification**

### ***Insurers Can Leverage a Single Enterprise Platform for Their Solutions Using SAP NetWeaver***

**Toronto, Canada – June 9, 2009** - Camilion Solutions, a leading provider of [insurance product development solutions](#) and [modern P&C policy administration systems](#) that create product agility, today announced that [Authority Suite®](#) V4.0, a fully functional modern policy administration system for the Property and Casualty (P&C) insurance market, has been certified by SAP AG as powered by the SAP NetWeaver® technology platform. To achieve this certification, Camilion Solutions demonstrated that Authority Suite 4.0 can be successfully deployed on a J2EE-based deployment of the SAP NetWeaver Application Server (SAP NetWeaver AS) Release 7.0. The deployment was tested and certified by the SAP® Integration and Certification Center.

Leveraging a service-oriented architecture and built on the most modern, rules and tools-based technology platform, Authority Suite supports the entire policy lifecycle, including application data capture, qualification, rating, quote management, bind, issuance, all the required policy endorsement functionality and easy integration to other enterprise systems. Authority Suite is powered by Camilion’s ProductAuthority®, a product development and management solution built specifically for the insurance market, which enables product agility by externalizing all product components from multiple, hard-coded operational systems into a central repository. Insurers can then inherit or assemble re-usable product components to modify existing products or build new ones.

According to Stephen Forte, research director, Gartner, Inc., “P&C insurers continue to struggle with integration of numerous internal and external applications especially when replacing a core system like policy administration. As vendors continue to improve the functionality and architecture of their solutions, adding certifications on different platforms will enable P&C insurers to reduce some of the complexity involved with these integrations.”

“Camilion is proud to be working with SAP to help meet the needs of our insurance customers,” said Ross Orrett, president & CEO, Camilion Solutions Inc. “By completing the ‘Powered by SAP NetWeaver’ certification, we have proven that Authority Suite properly integrates with SAP applications, enabling our customers to have a complete enterprise insurance solution on a single platform. P&C insurers have realized significant cost savings by optimizing and automating their policy and product development processes with

Authority Suite. Now, they can seamlessly integrate with SAP insurance solutions to leverage the added benefits of a total solution to achieve greater efficiencies and cost savings.”

---

### **About Authority Suite®**

Authority Suite, is a fully functional modern P&C policy administration system for all lines of business that provides a rich set of policy transactions, supports the entire policy administration lifecycle and enables “true” speed to market. Powered by ProductAuthority®, the market’s only “true” insurance product configurator, Authority Suite separates product from process by externalizing and storing all product components from legacy operational systems into a centralized product repository where products can be configured and modified easily. Authority Suite also includes ProductAuthority Lifecycle Manager, a web-based “desktop” that includes automated workflows, providing insurers the ability to track and manage tasks and participants involved in the product development process.

### **About Camilion Solutions™ Inc.**

Camilion Solutions, Inc. ([www.camilion.com](http://www.camilion.com)) is a leading provider of world-class insurance product development solutions and modern P&C policy administration systems that create product agility. With some of the world’s largest insurers as customers, Camilion uses its deep knowledge of the insurance industry to enable mid-to large-size insurers to concurrently develop or modify quality products, get these products to market faster, [automate underwriting](#), enable straight-through processing, and deploy a modern technology platform, all while mitigating risk and reducing costs. Camilion is a privately owned corporation founded in 2001 with offices in Toronto and New York.
